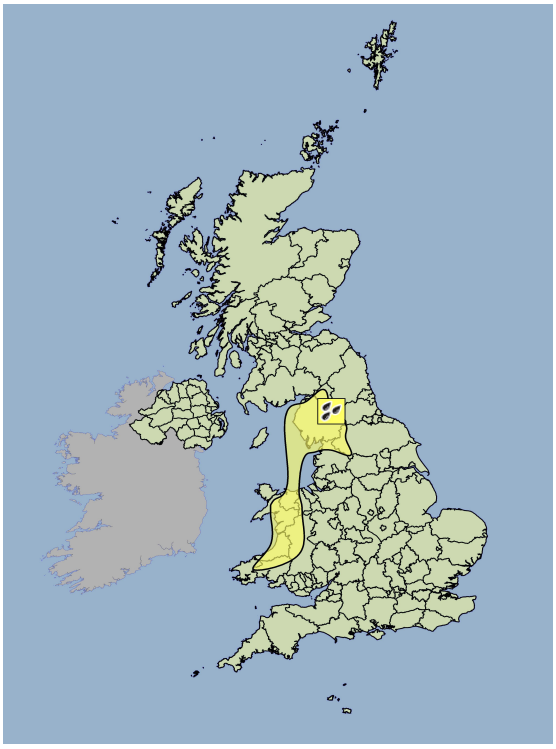
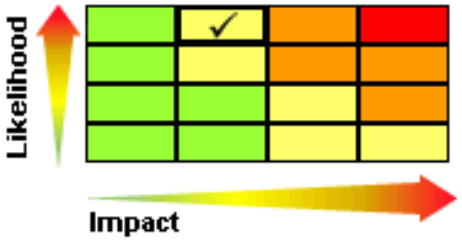
# National Severe Weather Warning Service





**Chief Forecasters Assessment**
Another period of strong, moist southwesterly winds is bringing heavy rain to some areas, particularly high ground in western Britain. There is a risk of surface water flooding as rainfall totals of 20 to 40 mm fall quite widely and locally 60-80 mm is possible over prone hilly areas.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **12:00 on Tue, 22nd Dec 2015** until **18:00 on Tue, 22nd Dec 2015**

Further spells of heavy rain are likely to affect parts of Wales and northwest England this afternoon.

Please be aware of the possibility of localised flooding of roads and properties, with the situation remaining sensitive in some areas affected by recent flooding.

This warning has been updated to reflect clearance of rain from Scotland and extent of disruptive rain over parts of Wales and northern England.

**For more details please go to:**
